Data in Aged Care - Notes

- The following slides show how GEN Data can be displayed in the BI Tool Sisense.
- These data are available for all to look at via our website www.RAPIDBI.com.au
- Australia's Aged Care facilities, as a result of the Royal Commission, are now required to do mandatory data reporting. As that data is now available in a standardised format and it can be used for benchmarking. This is a good thing as it can directly drive service improvement.

THE AGED CARE ROYAL COMMISSION

The Royal Commission ran from October 2018 to Feb 2021

Identified \$9.8B of additional funding

New accreditation and data gathering requirements

Above all though Care is Care – that hasn't changed

“unfortunately, the Royal Commission did not provide a clear roadmap to a better system. The final report was littered with disagreements between the two Commissioners”

The next steps for aged care – Grattan Institute, April 2021

ELAA (*EVERYONE LOVES AN ACRONYM*)

NACQUIP - National Aged Care Mandatory Quality Indicator Program

ANC-CC - Australian National Aged Care Classification

IHPA/IHACPA – Independent Hospital (Aged Care) Pricing Authority

GEN / NACDC - National Aged Care Data Clearinghouse

ACSQH - Australian Commission on Safety and Quality in Health

Prediction 1 – hardly new – IHPA and ASCQH will link funding to activity

Prediction 2 – they will use the QIs to monitor and inform improvement

Prediction 3 – they will attempt to link QIs to funding – but that won't happen

QUALITY INDICATOR REPORTING IS MANDATORY

Data gathering and cleaning can be a painful and time-consuming process

But you're going to have to do it, your software will eventually let you generate the required reports – but you need that right now.

Sisense can mashup data from any source system, and can generate those reports automatically – so why wait?

Now

Soon

Data is a mess, unlinked, haphazard useless

You can work here ...

WHAT CAN SISENSE DO?

GEN provides QI reports in the public domain

GEN also has de-identified data of who is in Aged Care

What do you get if you use that data in Sisense?

Use of physical restraint in residential aged care, April to June 2021

Indicator category	Number of restraints	Number per 1,000 care days*
Intent to restrain	21,369	1.26
Physical restraint devices	49,415	2.92

*Care recipient days for which an Australian Government subsidy was claimed.

DEMONSTRATION

These GEN dashboards are available to everyone

(goto www.RAPIDBI.com.au for free access)

We will add your data to those dashboards for you to see how you compare.

You get a dashboard, and you get a dashboard ... everyone gets a dashboard

You provide your QI data and we'll build you your own QI Dashboard

(yes it will be private!)

DO YOU WANT TO SEE MORE?

Don't just take this on trust

We'll build you an example

Using your QI data

Benchmarking your performance

Yes it is private

For free!

YOU HAVE TO DO IT ANYWAY

- You have to report on Quality Indicators – why not get some benefit?
- BENCHMARKING IS THE BEST WAY TO MONITOR AND IMPROVE ANYTHING – (not just Aged Care)

SISENSE WILL FIT YOUR REQUIREMENTS

- Sisense can be integrated seamlessly into existing systems
- It can run cloud or on prem – so will meet your security needs
- It uses it's own super fast data store – so no additional costs

YOU'LL PICK IT UP RIGHT AWAY

- It's easy to use, for instance St Andrews Hospital Adelaide run their own Sisense dashboards and benchmarking without any additional staff
- It will output to Excel or anything else
- embedded into your existing systems – no need to train

WHAT WE DO BEST

RAPID BI can assist with

- Benchmarking,
- Data Wrangling
- All BI work
- Dashboard development,
- visualizations & customization
- Sisense licensing
